

# 以旧换新企业垫资审核系统接口文档（试用稿）

V1.2

| 序号 | 更新内容                 | 日期         | 修改人 | 版本   |
|----|----------------------|------------|-----|------|
| 1  | 初稿                   | 2025.10.18 |     | V1.0 |
| 2  | 增加接口回传（家电）           | 2025.10.22 |     |      |
| 3  | 增加接口回传(3c 数码，家装，适老化) | 2025.10.29 |     | V1.1 |
| 4  | 文档更新了新增实时查询并返回接口     | 2025.10.30 |     |      |
| 5  | 增加“相关返回码”章节          | 2025.11.04 |     | V1.2 |
| 6  | 增加“查询审核退回数据”接口章节     | 2025.11.05 |     |      |

## 1. 接口用途

主要为“湖南以旧换新垫资审核系统”中各企业的补贴数据补充完善之用，包含补贴记录的各文本数据要素及图片要素的补充完善，最终以便开展数据审核及补贴等基础工作。

## 2. 主要流程

### 2.1. 流程方式一

申请接口权限及 SFTP 权限 → 调用权限验证接口 → 发起待完善数据查询  
→ 返回查询结果到 SFTP → 企业将整理的数据返回到 SFTP → 系统完成数据处理  
→ 返回处理结果到 SFTP

### 2.2. 流程方式二（建议方式）

申请接口权限及 SFTP 权限 → 调用权限验证接口 → 发起待完善数据查询  
→ 所有涉及图片上传到 SFTP → 以接口方式回传数据

## 3. 权限申请

### 3.1. 接口权限用户申请（已注册过的忽略此步骤）

登录网址：<https://yjhx.umshn.cn/yjhx/>

先在页面上申请注册绑定用户，绑定后的手机号为企业管理员登录账号，密码为自行设定的密码，在之后的合法权限验证中用到，[注册成功后请在登录系统验证并查看该用户确认已绑定对应商户编号](#)，未绑定请自行绑定，注册如下图：

### 3.2. 接口权限及 SFTP 账号申请

发送邮件至 [hunj@chinaums.com](mailto:hunj@chinaums.com) 申请账号：

邮件标题：申请“以旧换新企业垫资审核系统”补贴数据批量完善接口权限及 SFTP 权限

邮件内容写明：企业名称、企业统一社会信用代码、注册绑定的企业系统登录账号、需要加白名单的 IP

(邮件发送成功后建议同时通过其他方式通知查看邮件)

## 4. 相关接口

接口域名：咨询提供方。

### 4.1. 验证接口

进行账号验证并获取 token

4.1.1. 请求

| 事项             | 参数           | 内容                                                                                                         | 说明                                                                                                    |
|----------------|--------------|------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|

|                | sign         | 509931f555dbd72992a6c443e3aba33bec9331a3e78c142a11f8094a0a394161                                           | 按样例内容即可                                                                                               |
|                | signFactor:  |                                                                                                            | 空字符即可                                                                                                 |
|                | nonce        | 31760559884886                                                                                             | 每次不同随机数                                                                                               |
|                | reqTimestamp | 2025-10-18 11:22:59                                                                                        | 当前调用接口的时间                                                                                             |
| Request Body   |              | <pre>{"userNo":"test","password":"MTIzNDU2","captcha":"    随机6位数字","uuid":"","grantType":"password"}</pre> | userNo 为登录账号。<br>需要传值的项：userNo,password,captcha，其他按样例内容即可，其中 password 需进行 Base64 转码，captcha 为随机 6 位数字 |
| 编码             |              | UTF-8                                                                                                      |                                                                                                       |

4.1.2. 返回

```
{
  "code": "200",
  "message": "操作成功",
}
```

```
    "commonInfo": {
      "data": {
        "token":
"eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzI1NiJ9.eyJsb2dpbIR5cGUiOiJsb2dpbilslmxvZ2luSWQi
OiJzeXNfdXNlcjoxOTI2ODI2MjA4ODkzMTY1NTcwliwicm5TdHliOiJLU2kxcldNMjVPeWhy
c2hYZmtORTJXNDM2aWNyeHBsYyIsbnVzZXJJZCI6MTkyNjgyNjIwODg5MzE2NTU3MH0.
W4kbG7Cd6uMtX3jyyEEJMFj-OA8qBqAE-EaANV6vIB8",
        "loginUser": {
          }
        }
      },
      "success": true
    }
  }
```

在返回成功的结果中获取 token，在之后的查询接口需要用于验证（token 30 分钟内有效）。

## 4.2. 查询接口（暂未启用）

### 4.2.1. 请求

| 事项             | 参数    | 内容                                                                                                                                                                                                                                                                    | 说明                                                                             |

### 4.2.2. 返回

接口返回分两部分，一部分为实时返回部分，另一部分为查询结果文件异步推送到 SFTP。

#### 4.2.2.1. 实时返回

```
{
  "code": "200",
  "message": "操作成功",
  "commonInfo": {
    "data": {
      "perfectDocument": "/home/20251018_203411_20251018QDDJ.xlsx ",
      "taskId": "20251018V2Y8"
    }
  },
  "success": true
}
```

#### 4.2.2.2. 查询结果异步返回 SFTP

注意： 以下章节皆以示例文件“20251018\_203411\_20251018QDDJ.xlsx”为例。

请记录以上接口参数 perfectDocument 返回的 xlsx 文件名, 在 SFTP 中的 home 目录中监测 20251018\_203411\_20251018QDDJ.xls 是否已产生 (产生时间根据您的数据量大小有关) , 文件产生则可以根据此文件完善信息及图片。

注意： 不同的板块返回的文件所需要完善的列可能是不一样的, 具体根据返回的文

件确定需要补充哪些文本信息和图片信息。

### 4.3. 数据回传到 SFTP（暂未启用）

#### 4.3.1. 上传的路径

/home/upload/

#### 4.3.2. 回传文件要求

文件名：20251018\_203411\_20251018QDDJ.zip，并以查询接口中实时返回的 taskId 作为压缩密码压缩。（注意：ZIP 为广泛使用的压缩格式，支持多种压缩算法和加密方式。使用 zipParameters.setEncryptionMethod(EncryptionMethod.ZIP\_STANDARD) 方式压缩时需请指定加密方式为标准方式，否则 linux 下无法解压）

压缩包根目录包含：

- (1) 文件：20251018\_203411\_20251018QDDJ.xlsx，为信息完善后的文件。
- (2) 目录：images，所有的图片文件放置在此目录下，此目录中不要创建下级目录，图片文件名与回传 xlsx 文件中对应图片字段的文件名一致。

注意：xlsx 文件中的前 3 列（主键、板块类型、商户订单号）在返回时内容请不要做任何修改，并且所有表头请不要修改，zip 上传过程中建议使用临时文件名 20251018\_203411\_20251018QDDJ.zip.tmp，上传完成后修改为正式名称 20251018\_203411\_20251018QDDJ.zip。

### 4.4. SFTP 查看处理结果（暂未启用）

#### 4.4.1. 路径

/home/

4.4.2. 文件名

20251018\_203411\_20251018QDDJ\_fail.xlsx，文件返回失败的记录及原因。

4.5. 查询接口（实时返回）

4.5.1. 家电

4.5.1.1. 查询

| 事项             | 参数    | 内容                                                                                                                                                                                                                                                                  | 说明                                                                                                       |

## 4.6. 接口方式回传

### 4.6.1. [注意的几点](#)

- (1) 先调用验证接口获取需要的 token。
- (2) 通过查询接口获取到待完善补充的数据记录。
- (3) 先将所有相关图片上传至 SFTP 图片目录/home/upload/image（图片目录没有请自行创建，图片目录下不要创建下级目录；[目录中的图片文件系统会定期进行清理](#)），并确保以下请求接口中图片项涉及的图片名可以在此

目录下中找到。然后再调用以下各板块请求接口。

4.6.2. 家电

4.6.2.1. 请求

| 事项             | 参数           | 内容                                                                                                                                                                                                                                                                  | 说明                               |
